1 Papers from Hotnets-II: Unmanaged Internet Protocol: taming the edge network management crisis

Bryan Ford

Best 200 shown

January 2004 ACM SIGCOMM Computer Communication Review, Volume 34 Issue 1

Full text available: pdf(278.18 KB) Additional Information: full citation, abstract, references

Though appropriate for core Internet infrastructure, the Internet Protocol is unsuited to routing within and between emerging ad-hoc edge networks due to its dependence on hierarchical, administratively assigned addresses. Existing ad-hoc routing protocols address the management problem but do not scale to Internet-wide networks. The promise of ubiquitous network computing cannot be fulfilled until we develop an *Unmanaged Internet* Protocol (UIP), a scalable routing protocol that manages i ...

2 Level II technical support in a distributed computing environment

4 Towards an active network architecture David L. Tennenhouse, David J. Wetherall April 1996 ACM SIGCOMM Computer Communication Review, Volume 26 Issue 2

Additional Information: full citation, abstract, citings, index terms Full text available: pdf(1.58 MB)

Active networks allow their users to inject customized programs into the nodes of the network. An extreme case, in which we are most interested, replaces packets with "capsules" - program fragments that are executed at each network router/switch they traverse. Active architectures permit a massive increase in the sophistication of the computation that is performed within the network. They will enable new applications, especially those based on application-specific multicast, information fusion, a ...

5 Mobile computing: DataMan project perspective

Tomasz Imielinski

December 1996 Mobile Networks and Applications, Volume 1 Issue 4

Full text available: pdf(239.53 KB) Additional Information: full citation, abstract, references, index terms

The objective of mobile computing is to develop system and application level software for small, battery powered terminals equipped with the wireless network connection. There is a rapidly growing interest in this field with companies spending billions of dollars developing technology and buying spectrum in the recent PCS auctions. In this paper we offer a perspective of mobile computing from the standpoint of our own research project at Rutgers University. The DataMan project (T.Imielinski ...

6 Large-scale experimental study of Internet performance using video traffic Dmitri Loquinov, Hayder Radha

January 2002 ACM SIGCOMM Computer Communication Review, Volume 32 Issue 1

Full text available: pdf(1.23 MB)

Additional Information: full citation, abstract, references, citings, index

In this paper, we analyze the results of a seven-month real-time streaming experiment, which was conducted between a number of unicast dialup clients, connecting to the Internet through access points in more than 600 major U.S. cities, and a backbone video server. During the experiment, the clients streamed low-bitrate MPEG-4 video sequences from the server over paths with more than 5,000 distinct Internet routers. We describe the methodology of the experiment, the architecture of our NACK-based ...

Some social implications of ubiquitous wireless networks

Marc A. Smith

April 2000 ACM SIGMOBILE Mobile Computing and Communications Review, Volume 4 Issue 2

Full text available: pdf(1.41 MB) Additional Information: full citation, abstract, index terms

Wireless computer networks and the devices to communicate with them are about to become ubiquitous. A profusion of devices is likely to emerge quickly in specialized form factors, from handhelds to cheap, disposable sensors. Groups of people using these tools will gain new forms of social power, ways to organize and coordinate their interactions and exchanges just in time and just in place. Using these tools, people will be able to collectively construct a range of resources that were too diffic ...

11 Architectural components for the efficient design of mobile agent systems Marthie Schoeman, Elsabé Cloete

September 2003 Proceedings of the 2003 annual research conference of the South African institute of computer scientists and information technologists on Enablement through technology

Full text available: 🔂 pdf(136.00 KB) Additional Information: full citation, abstract, references, index terms

Over the past eighteen months, there has been a renewed interest in mobile agent technology due to the continued exponential growth of Internet applications, the establishment of open standards for these applications, as well as the semantic web developments. However, the lack of a standardised programming model addressing all aspects of mobile agent systems prevents widespread deployment of the potentially useful technology. The architectural requirements dealing with all aspects of a mobile ag ...

13 Engineering web cache consistency

Jian Yin, Lorenzo Alvisi, Mike Dahlin, Arun Iyengar

August 2002 ACM Transactions on Internet Technology (TOIT), Volume 2 Issue 3

Full text available: pdf(403.96 KB) Additional Information: full citation, abstract, references, index terms

Server-driven consistency protocols can reduce read latency and improve data freshness for a given network and server overhead, compared to the traditional consistency protocols that rely on client polling. Server-driven consistency protocols appear particularly attractive for large-scale dynamic Web workloads because dynamically generated data can change rapidly and unpredictably. However, there have been few reports on engineering server-driven consistency for such workloads. This article repo ...

December 2002 ACM Computing Surveys (CSUR), Volume 34 Issue 4

Full text available: pdf(205.25 KB)

Additional Information: full citation, abstract, references, citings, index terms

This article is a survey of research areas in which motion plays a pivotal role. The aim of the article is to review current approaches to modeling motion together with related data structures and algorithms, and to summarize the challenges that lie ahead in producing a more unified theory of motion representation that would be useful across several disciplines.

Keywords: Computational geometry, computer vision, mobile networks, modeling, molecular biology, motion modeling, physical simulation, robotoics, spatio-temporal databases

16 Design and implementation of a web-based Internet performance management system using SNMP MIB-II0

Seong Jin Ahn, Seung Keun Yoo, Jin Wook Chung

September 1999 International Journal of Network Management, Volume 9 Issue 5

Full text available: pdf(842.57 KB) Additional Information: full citation, abstract, references, index terms

This article is aimed at defining items of analysis using SNMP MIB‐ II for the purpose of analyzing the performance of Internet‐ based networks running on TCP/ IP protocol, and then utilizing these items, in conjunction with various Web technology and JAVA, to design and implement a Web‐ based interface of a management system to analyze the performance of the Internet. 17 The transport layer: tutorial and survey

Sami Iren, Paul D. Amer, Phillip T. Conrad

December 1999 ACM Computing Surveys (CSUR), Volume 31 Issue 4

Full text available: pdf(261.78 KB)

Additional Information: full citation, abstract, references, citings, index terms

Transport layer protocols provide for end-to-end communication between two or more hosts. This paper presents a tutorial on transport layer concepts and terminology, and a survey of transport layer services and protocols. The transport layer protocol TCP is used as a reference point, and compared and contrasted with nineteen other protocols designed over the past two decades. The service and protocol features of twelve of the most important protocols are summarized in both text and tables. < ...

18 Position papers: A delay-tolerant network architecture for challenged internets Kevin Fall

August 2003 Proceedings of the 2003 conference on Applications, technologies, architectures, and protocols for computer communications

Full text available: pdf(100.02 KB)

Additional Information: full citation, abstract, references, citings, index

The highly successful architecture and protocols of today's Internet may operate poorly in environments characterized by very long delay paths and frequent network partitions. These problems are exacerbated by end nodes with limited power or memory resources. Often deployed in mobile and extreme environments lacking continuous connectivity, many such networks have their own specialized protocols, and do not utilize IP. To achieve interoperability between them, we propose a network architecture a ...

Vol. 2 - Conference B: Computer Vision & Image Processing., Proceedings of the 12th IAPR International. Conference on , Volume 2, 9-13 Oct. 1994 Pages: 586 - 588 vol.2

[PDF Full-Text (212 KB)] [Abstract] **IEEE CNF**

4 Transport control protocols for wireless connections

ElAarag, H.A.; Bassiouni, M.A.;

Vehicular Technology Conference, 1999 IEEE 49th, Volume: 1, 16-20 May 19

Pages:337 - 341 vol.1

[PDF Full-Text (392 KB)] [Abstract] **IEEE CNF**

5 A "persistent connection" model for mobile and distributed systems Yongguang Zhang; Son Dao;

Computer Communications and Networks, 1995. Proceedings., Fourth Interna Conference on , 20-23 Sept. 1995

Pages:300 - 307

[Abstract] [PDF Full-Text (876 KB)] **IEEE CNF**

6 Training a network with ternary weights using the CHIR algorithm

Abramson, S.; Saad, D.; Marom, E.;

Neural Networks, IEEE Transactions on , Volume: 4 , Issue: 6 , Nov. 1993

Pages:997 - 1000

[Abstract] [PDF Full-Text (288 KB)]

7 Partitioning capabilities of two-layer neural networks

Makhoul, J.; El-Jaroudi, A.; Schwartz, R.;

Signal Processing, IEEE Transactions on [see also Acoustics, Speech, and Sign Processing, IEEE Transactions on], Volume: 39, Issue: 6, June 1991 Pages:1435 - 1440

[Abstract] [PDF Full-Text (496 KB)]

8 Leaky buckets: sizing and admission control

Kulkarni, V.G.; Gautam, N.;

Decision and Control, 1996., Proceedings of the 35th IEEE, Volume: 1, 11-1.

Dec. 1996

Pages: 785 - 790 vol.1

[PDF Full-Text (476 KB)] [Abstract] **IEEE CNF**

9 Bifurcation phenomena from a simple hysteresis network

Jin'no, K.;

Circuits and Systems, 1995. ISCAS '95., 1995 IEEE International Symposium on , Volume: 2 , 28 April-3 May 1995

Pages:1001 - 1004 vol.2

[Abstract] [PDF Full-Text (276 KB)] **IEEE CNF**

10 Changing communication environments in MosquitoNet

Baker, M.G.;

Mobile Computing Systems and Applications, 1994. Proceedings., Workshop o 9 Dec. 1994

Pages:64 - 68

[PDF Full-Text (508 KB)] [Abstract] **IEEE CNF**

11 How to secure MV networks so as to cope with extreme weather conditions

de la Bourdonnaye, A.; Gauthier, L.; Gratton, M.;

Electricity Distribution, 2001. Part 1: Contributions. CIRED. 16th International Conference and Exhibition on (IEE Conf. Publ No. 482), Volume: 5, 18-21 Ju 2001

Pages:10 pp. vol.5

[PDF Full-Text (348 KB)] [Abstract] **IEE CNF**

12 Transient phenomena in bridged local area networks

Ersoy, C.; Panwar, S.S.; Dalias, R.; Segal, D.; Global Telecommunications Conference, 1990, and Exhibition. 'Communication Connecting the Future', GLOBECOM '90., IEEE , 2-5 Dec. 1990 Pages:1405 - 1409 vol.3

[Abstract] [PDF Full-Text (392 KB)]

13 IEEE standard requirements for secondary network protectors

IEEE Std C57.12.44-1994, 28 Dec. 1994 [PDF Full-Text (2316 KB)] [Abstract]

14 Petri Nets Theory for the Correctness of Protocols

Berthelot, G.; Terrat, R.;

Communications, IEEE Transactions on [legacy, pre - 1988], Volume: 30, Is: 12, Dec 1982

Pages: 2497 - 2505

[Abstract] [PDF Full-Text (856 KB)] **IEEE JNL**

15 Discontinuities driven by a billion connected machines

Gelsinger, P.;

Design & Test of Computers, IEEE , Volume: 17 , Issue: 1 , Jan.-March 2000

Pages:7 - 15

[Abstract] [PDF Full-Text (376 KB)] **IEEE JNL**
